

Aerial Work Platforms

Aerial Work Platform - There are many attachments intended for lift trucks that can be utilized so as to help expand the capabilities of your forklift and allow you to lift objects, handle materials with out difficulty or to accomplish clean-up tasks.

A few accessories were particularly designed for the forks themselves. For instance, blade extensions can be utilized when you require much more fork length, that increases lifting capacity. Fork extensions come in lengths ranging from 48-120 inches. Rounded or triangular attachments are another variety used when transporting rolled material in order to make sure it does not roll off of the typical flat forks.

Examples of lifting accessories comprise pivoting and telescoping boom or crane attachments. They can come in a number of different styles and are most often meant for transporting lumber, poles, metal bars and other types of bulky stuff. Additional attachments like for instance different kinds of hooks and hook plates are presented in order to carry items making use of a sling or chain. Slab lifters and magnetic lifters are other items which can be used together with hook attachments. Slab lifters are specialized attachments that are intended for carrying a variety of materials that are delivered in a sheet or slab format. Carpet poles and rug rams are other lifting tools that connect to your forklift to be able to make moving rolls of carpet much easier. The attachment connects onto the forklift's forks and has a pole which goes through the center of the carpet roll.

There are several other kinds of forklift accessories that could be meant for facility maintenance like snow blades. These forks attach to front end loaders and can transport materials such as soil, snow and dirt. Other popular cleanup accessories comprise magnetic sweepers and standard sweepers. Standard sweepers includes a broom that the forklift blades hook onto for sweeping large spaces like for example warehouse, factory floors and parking lots. The magnetic sweeper is the same except that it has a magnetic plate rather than bristles. The magnetic sweeper is utilized in areas where there is lots of metal fragments like on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up simple and quick.

A material spreader is another lift truck accessory which is usually used at facilities. These spreaders are useful for a variety of applications like for example spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Work platforms are another optional lifting accessory that many businesses use daily. The platforms range in size from 36" x 36" to up to 60" x 60". There are a few models existing that are capable of folding up and storing into a smaller space. Work platforms are designed to raise employees up to an overhead location using the forklift. Larger platform units have added space for employees to bring tools and other essential things meant for the job. Often work platforms are constructed of poly material or steel.
