

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove started out on a cross country RV expedition. After spending many years establishing his family built crane business with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

All through their journey, John reacquainted himself with former business acquaintances along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite marketplace for a product that could swiftly and safely lift people in the air to accomplish maintenance and other building functions.

Upon returning from their travels, John established a partnership with two friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they designed and sold the first JLG aerial work platform. The business incorporates many of the basic design essentials of that original lift into current models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the company has expanded itself into many different global markets and continues to develop innovative machines to guarantee that clients are able to become safer and more resourceful within their workplace.
